HOW TO: Find a Journal Using the A-Z List of Journals

Step 1: Go to http://library.ucalgary.ca/. Click on the Search Collections tab.

Step 2: Find Journals and click on this.
Step 3: You have several choices on this screen.

- Browse through the A-Z list of electronic journals
- Find electronic journals by words in the title of journal or ISSN number
- Browse electronic journals by very broad subject area
- Find both print and electronic journals by title or ISSN number. NB. This is the same as using the Classic Catalogue to find a journal. It’s just another way of getting to the Classic Catalogue.

Step 4: Once you have found the journal you want, you can systemically browse through each issue.
